Art Unit: 3711

This application is in condition for allowance except for the following formal matters:

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The Abstract needs need to be shortened to 150 words or less.

In claim 1 it is stated that the tip has a cavity therein. The specification provides that it is the ferrule that has the cavity therein. Either the language of the specification or the claim needs to be adjusted accordingly to clarify the elements being recited in the claim language.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Holt, Valentine, Taylor, Monteiro, Shirley, and Chipman have been cited for interest because they disclose similar devices. Holt is clearly the most pertinent but is constructed such that it does not anticipate, or alone or in combination with other art fairly suggest the particularly claimed cue stick of applicant's claim 1.
